Blair Hart for Archie and Belle. Easy Jim, how do you stand on this Supervisory question?

Secretary Weske Resigns as Secretary of Sonoma State Home, and Thereby Hangs a Tale

With a new Board of Directors of the Sonoma State Home, the personnel of which was recently changed by Governor Johnson to give a place to his political adherents, Secretary H. W. A. Weske of the Board of Managers tendered his resignation to its members last week. In other words he did not stand upon the order of going but took time by the forelock and simply got out, as he wisely knew what was coming to him.

The resignation will take effect July 1st, and Frank A. Cromwell, who had previously served on the Board as its Secretary for five years, has been slated by the powers that be to take the position. Mr. Weske during his incumbency held the position with honor and dignity. He was not a programmer, however, and had he not resigned he would have been compelled to walk the plank anyhow, as a victim of the rule of the bosses.

A. Beretta Meets With an Accident.

A. Beretta, Secretary of the Sonoma Brewing Co., met with an accident last Saturday morning which will lay him up for some little time. While driving along the lower part of Spain street in one of the small delivery wagons of the brewery the horse stumbled, throwing Mr. Beretta from his seat. He struck the ground heavily and sprained his right ankle badly. Passers-by picked the injured brewery man up and took him to Leix's Sanitarium, where Dr. F. Leix attended to the injury. Mr. Beretta is flat on his back at his home on Second-street East and is being attended to by his faithful wife. He may be up and around on crutches next week.

THE NEW BLACK POINT DRAWBRIDGE

It Will Go Into Commission Today --- It is the Second Largest Structure of its Kind on the Coast

The new drawbridge which has been in the course of erection for several months across the mouth of Petaluma Creek at Black Point by the Northwestern Pacific Railroad was swung into position yesterday and trains will pass over it from now on.

The bridge is the second largest in the state, weighing 450 tons, as compared to 130 the weight of the one it is replacing and 170 tons for the Petaluma draw bridge. The new bridge has been erected so that the traffic can be changed from the old one to the new one without interruption of traffic for a single minute.

The new draw has a span of 250 feet which turns so as to clear the creek for passage of boats up and down stream. The work is under the direction of General Foreman Ed. Pagels and assistant engineer I. Kessel and J. W. Rowe.

Wanton Waste of Water

A number of the patrons of our local water system, now that the hot weather is here, should have a care in using the water and not permit a wanton waste of the same. This request, made by Mrs. Emparan of the Sonoma City Water Works Co., elsewhere in these columns, is no more fair to the water company than to those of its patrons who use common sense and judgment in using the water and who would get a better service were it not for the wasteful patrons. Mrs. Emparan gives notice to these that if they do not cease wasting the water she will be compelled to put in meters on the premises of all such, and that is just what she ought to do. Some people in this world imagine others have no rights which they are bound to respect, and the water hog is no exception to the rule.

Sells Ranch to New Comer.

O. R. Wagner, the well-known real estate man of this city, has sold his ranch of 52½ acres to C. C. Bills of San Francisco, who will make many improvements on his purchase. The ranch is located near the San Luis school house and was purchased last year by Mr. Wagner on speculation.

WHEW! OLD SOL HANDS OUT HOT ONE

Sunday a Scorching---Ice Famine Averted by a Local Enterprise---Sonoma Brewing Co. to the Rescue

Old Sol sure did put one over on sweltering humanity in this valley Sunday, which was one of the hottest days of the season, the thermometer varying between 90 degrees in the shade at 10 o'clock in the morning to 102 at 4 o'clock in the afternoon.

Early in the morning it was apparent that a veritable scorching was in sight and by 9 o'clock the telephone wires leading to the business office of the Sonoma Brewing and Ice Co., were kept sizzling with frantic calls for ice sent in by the shortsighted patrons of a rival out-of-town concern that is endeavoring to freeze out of business the one remaining ice plant of Sonoma Valley, that of the Sonoma Brewing Co.

The cause of it all was that the ice of its out-of-town rival gave out Saturday evening and when the hot wave swept over Sonoma Valley Sunday morning it could not deliver the goods to its customers.

However, the ten-ton plant of the Sonoma Brewing Co., one of Sonoma's leading local enterprises, was equal to the emergency and three delivery wagons were soon responding to the frantic calls for ice all forenoon of Sunday, the orders of those patrons of the out-of-town concern being served by the Sonoma brewery people as cheerfully and promptly as those of regular customers. The local plant also helped out Petaluma with 4,000 pounds of ice from an immense stock always on hand to meet just such emergencies.

Now, there is a moral attached to this news item. It is this: Patronize a home industry, to the end that you assist in building up and not pulling down your own community. The rival concern, we refer to is Grace Bros. of Santa Rosa, who have already forced the Bose ice plant out of business, and it has been reported to the Index-Tribune that one of the members of that firm recently boasted that they had made forty thousand dollars out of hops last spring and that if it took every cent of that money they would close up the Sonoma Brewery and ice plant.

Assuming that we have been correctly informed and that the \$60,000 plant of the Sonoma Brewing Co., owned and controlled by fifty local stockholders, representing the best citizenship and most enterprising spirit of the Sonoma Valley, should be forced out of business and the boast quoted above made good, where do the ice consumers of both town and valley get off? They now pay one-half cent a pound for their ice. With the only remaining local ice plant forced out of business our people would sure be made to pay for their ice—and it wouldn't be at half a cent a pound, either.

In this connection we wish to put in a good word for the Sonoma Brewery and its fifty resident and enterprising stockholders. The plant, complete in every detail, represents an investment of at least \$60,000, every cent of the amount being local capital, and we submit that every progressive and fair-minded man and woman who desires both town and valley to grow and prosper should stand by this local enterprise as against those on the outside who would destroy it.

The Sonoma Brewing Co., is more than deserving of the patronage of our people. It is turning out the finest ice, so experts affirm, that has ever been turned out by any ice plant in the State. The product is made out of distilled artesian water and free from germs and so solid it is frozen that its lasting powers is almost double that of the product of the average ice plant—a health preserver and a money saver as well.

The Sonoma brewery is also putting on the market most excellent steam and lager beer, the equal of any turned out on the coast, knockers to the contrary notwithstanding.

This being the case, there can be no excuse for not patronizing this great home industry, which gives employment to eight and ten heads of families in this city the year round. Boost this local enterprise and keep your money at home.

A special on Beds and Bedding this week. Get our prices and you won't be disappointed. F. Cleve.

MODERN LIFE-SAVING BOARD DECLARES BOAT EQUIPMENT IT A DRY DISTRICT.

The Southern Pacific Company is Abreast of the Times to Protect the Lives of its Steamer Passengers

In response to many requests for information regarding the life-saving equipment on Southern Pacific liners plying between New Orleans and New York, which are often used by travelers from California over the Sunset Route, the Passenger Department has issued the following statement:

"The Southern Pacific steamships are now, and always have been, equipped with a sufficient number of life-boats to carry every passenger and member of the crew to safety in case of accidents which by the way, is extremely unlikely, owing to the intimate knowledge of the route possessed by all officers employed. Each ship is equipped with wireless and is in touch with shore stations during the entire voyage."

"In addition, notices are posted in all state-rooms, public rooms and steerage, showing the assignments of occupants to specific boats, and the boats are all plainly and conspicuously numbered so that no mistake could be made. Fire and boat drills are held the first day out and at every port of call. The passengers are cordially invited to participate in these drills. Stewards always instruct passengers how to adjust the individual life-belts and how to move through the water if necessary."

"These rules are not new, but have been in operation on the Southern Pacific boats for several years."

The condition of the hay market this week, as reported by Somers & Co., remains unchanged. In their report of the 18th inst. they say:

"Hay continues to move to market in about the same quantity as has been arriving in San Francisco for some little time past, this week's shipments amounting to 2996 tons in comparison with 1975 the week previous. There has been no increase in the demand from consumers, and therefore conditions on the market remain about the same, although prices are weaker in anticipation of heavier arrivals—the harvest having progressed and there being a considerable quantity of new hay which will be available for shipment very shortly."

"During the week there has been a great deal of activity in buying. Dealers have naturally bought some little hay for shipment at prices which are being asked in the country, which are higher than the present market or the probable demand will warrant. With the exception of one or two instances, there has been no evidence of speculative buying; present prices, to which carrying charges must be added, will make hay cost extreme figures next winter and spring, and it is evident that the majority of handlers of hay consider this cost too great a risk. An open winter with plenty of early grass, together with the fact that it is probable that hay can be imported from outside States will certainly make a difference in our future market, and, therefore, a conservative policy for the most part seems to be prevalent."

INSECT SENSE OF SMELL

Ants Are Said to Recognize Their Different Species by Odor.

Students of the behavior of ants are well aware of the fact that they will not tolerate strange ants in their nests. If a foreign, even though of the same species and indistinguishable to human eyes from the lawful inhabitants of the nest, strays in from another nest she is apt to emerge hastily, pursued and attacked by the ants which belong there. How do they know that she is a foreigner? It does not seem likely that among the thousands of ants belonging to the nest another ant of exactly the same species should be recognized as a stranger by her appearance. The English naturalist Lord Avebury in his book on "Ants, Bees and Wasps" records some experiments to test the possibility that ants may recognize their nest mates through some movement of the feelers or antennae, with which they sometimes seem to greet each other when they meet.

He stupefied with alcohol ants from different nests and placed them near one of the nests. The ants from that nest came out and carried their helpless nest mates home, but threw the bodies of their enemies away. Evidently friend and foe were distinguished by something other than their behavior.

A German physiologist, Bethe, solved the problem in the following way: He suspected that ants from a foreign nest might have an odor that excited the warlike instincts of ants in the home nest. Accordingly he took a number of ants from one nest, killed them and crushed their bodies so that the body fluids were pressed out. Taking some live ants from a second nest, he first dipped them in water and alcohol and then into the body fluids of the other ants. He then returned them to their own nest. Their nest mates fell upon them as if they had been total strangers, and they were driven out and in some instances killed.

On the other hand, Bethe found that the foreign nest, the odor of which they now presumably bore, would receive peacefully the ants which had undergone the transforming treatment.

Other observers have confirmed these results of Bethe's for many species of ants. The truth, then, seems to be that any ant odor differing from their own puts the ants into a warlike attitude. It is true that this explanation requires one to suppose that a different odor belongs to every ant nest, and this seems hard to believe, yet nothing else appears to account for the facts.

There are many other remarkable things about the sense of smell in insects, and it must be remembered that the sense of smell in human beings is far inferior to that of some animals—for example, the dog. Man cannot judge the capacities of other animals in the matter of smell by his own poor performances.—Youth's Companion.

Early Writing.

Writing is an art with a history as complete as that of the arts of sculpture and painting. The material used by the early Romans was wax spread upon tablets. The letters were formed on the soft smooth surface with the pointed end of the stylus. The other end of the instrument was flat, and this was used to smooth over the surface where errors were found and prepare it for the correct writing. From this use the stylus has given the name "style" to the writer's manner of composing.

Real Balm of Gilead.

The real balm of Gilead is the dried juice of a low shrub, it is said, which grows in Syria. It is very valuable and scarce, for the amount of balm yielded by one shrub never exceeded sixty drops a day. According to Josephus, the balm or balsam of Gilead was one of the presents given by the queen of Sheba to King Solomon. The ancient Jewish physicians prescribed it evidently for dyspepsia and melancholia.

A Severe Condition.

"What did Naighob say when you told him you wanted to marry his daughter?" "He didn't absolutely refuse, but he imposed a very severe condition." "What was it?" "He said he would see me hanged first."

Needed More Flavor.

Customer—Look here, waiter, is that the stuff you've got the check to call out loud? Waiter—That's it, sir. Customer—Well, you'd better take it out and have the ox dip his tail in it two or three times more.—London Opinion.
